Assignment-2

Cloud App Development

Assignment Date	7 September 2022
Student Name	M. Fairose Parveen
Student Roll Number	812619104301
Maximum Marks	2 Marks

Question-1:

Write a flask program which should display name ,email ,phone and it should display the same details once we hit submit.

```
Solutions:
app.py:
from flask import Flask,render_template, request
app = Flask(__name___)
@app.route('/')
@app.route('/home')
def homepage():
  return render_template('reg.html')
@app.route("/confirm",methods=['POST','GET'])
def reg():
  if request.method=='POST':
    n = request.form.get('name')
    a = request.form.get('age')
    c = request.form.get('city')
    return render template('confirm.html',name = n,age =a ,city = c)
```

```
if __name__=="__main___":
  app.run(debug=True)
reg.html:
<html>
<head>
<meta charset="UTF-8">
<title>Registration</title>
</head>
<body>
<form action="/confirm" method="post">
<label>Name</label>
<input type="text" name="name">
<label>Age</label>
<input type="text" name="age">
<label>City</label>
<input type="text" name="city">
<input type="submit">
</body>
</html>
confirm.html:
<html>
<head>
<title></title>
</head>
<body>
<h1>Registration Successful</h1>
```

```
Name
{fname}

Age
{fage}

City
{fcity}

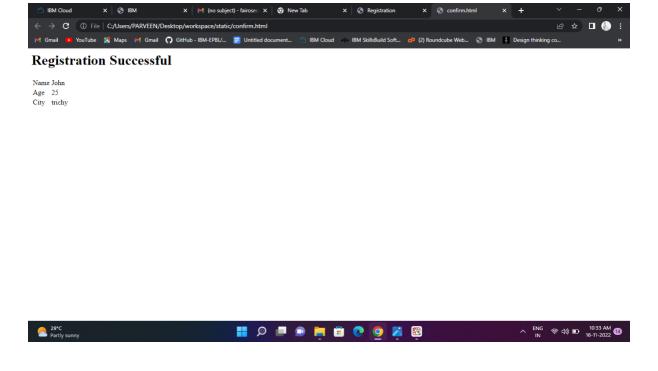

</r>

</p
```

Output:

Question-2:

Write a flask program which should cover cookies, sessions.

```
Solutions:
```

```
cookie.py:
from flask import *
app = Flask(__name__)

@app.route('/')
def setcookie():
    res = make_response("cookie is set")
    res.set_cookie('Flask' , 'Framework')
    return res

if __name__ =='__main__':
    app.run(debug=True)
```

Output:

Question-3:

Write a flask program which should display resume details and also have upload resume option.

```
Solutions:
uploadfile.html:
<html>
<body>
<form action = "/uploader" method = "POST" enctype = "multipart/form-data">
<input type ="file" name = "file">
<input type = "submit"/>
</form>
</body>
</html>
uploadfile.py:
from flask import Flask, render template, request
from werkzeug.utils import secure_filename
app = Flask(__name__)
@app.route('/')
def upload_file():
  return render_template('uploadfile.html')
@app.route('/uploader',methods = ['GET','POST'])
def flask_upload():
  if request.method == 'POST':
    f=request.files['file']
    f.save(secure_filename(f.filename))
    return 'file uploaded successfully'
```

```
if __name__=='__main__':
    app.run(debug=True)
```

Output:
